

Wisconsin Institute for Next Generation Science

RECHARGING PASSION & PEDAGOGY

SPONSORSHIP INFORMATION

Dear Partners in Science Education,

Wisconsin's premiere professional development learning opportunity is coming once again! Veteran educators might reminisce about the impact that Science World had on their careers. WSST's current leaders can speak about the incredible networking and learning that took place at Science Futures. Now science educators are being invited to be a part of the **Wisconsin Institute for Next Generation Science!**

The WSST professional development committee is planning a transformational experience that will fuel passion for delivering high quality science learning experiences for students. It will also serve as a professional retreat, giving educators opportunities to reflect on the impact that they are having in the profession and help to cultivate their leadership in the classroom and beyond.

WSST aims to treat our educators well. With your help we can make this experience unforgettable and highly impactful. The pandemic has certainly taken its toll on educators. Now, more than ever, our teachers need to be treated as professionals. WSST is self-funding this iteration of PD due to a lack of state and federal funds for science teacher Professional Development. Please consider joining us by sponsoring one of the portions of this experience to thank Wisconsin's science teachers and invest in the future of science education in Wisconsin.

Chad W. Janowski
WSST Professional Development Chair

July 17-21, 2022 | Conserve School | Land O'Lakes, WI

Wisconsin Institute for Next Generation Science

RECHARGING PASSION & PEDAGOGY

SPONSORSHIP INFORMATION

The Wisconsin Institute for Next Generation Science (WINGS) is a WSST professional development experience. 5 cohorts of 25 Wisconsin science educators will be selected to participate over the next 5 years. The main objectives are the development of excellence in instructional delivery and the cultivation of leadership in the classroom and beyond. The networking and professional learning will strengthen the community of science educators and elevate the quality of science instruction in the state.
